Greater St. Louis | 636-575-1811 | uzbekbory@gmail.com

OBJECTIVE

Passionate and detail-oriented Software Engineer with a strong commitment to excellence and innovation. Known for consistently going the extra step to ensure optimal functionality, user satisfaction, and scalable design. Experienced in building reliable, high-performance software systems and eager to contribute to impactful projects that make a difference.

EDUCATION

Truman State University   Kirksville, MO
                                                                                                Spring 2023

Bachelor of Science in Computer Science

EXPERIENCE

Prologue Technology - *Software Engineer II*   O'Fallon, MO
                                                                                                Aug 2023 - Current

- Led multiple software projects from planning to deployment and maintenance.
- Built and supported five apps integrating Jira and NetSuite APIs using PHP, MySQL, Laravel, and Vue.js.
- Promoted to Software Engineer II for technical leadership and delivering high-quality solutions.
- Improved code quality through peer reviews, CI/CD enhancements, and best practices.
- Mentored junior developers and fostered a collaborative engineering culture.
- Developed a custom Finance tool, automating workflows and saving 500+ hours annually.

K&F Express LLC - *Software Developer I*   Manchester, MO
                                                                                                Jan 2019 – Aug 2023

- Built a fleet management app for trucking companies to optimize operations and resource use.
- Initially developed with React and Firebase, later rebuilt with Laravel and Vue.js to cut costs and improve performance. Saved $5,000 in recurring monthly server bills.
- Adopted by companies managing 200+ drivers, supporting daily logistics and dispatch.
- Led a 5-person team to develop a web app integrated with Amazon Relay for driver task management.
- Used React, .NET, C#, TypeScript, JavaScript, PHP, HTML/CSS, and Firebase
- Improved driver workflows with real-time tracking, route updates, and performance analytics.

Truman State University - *Web Developer*   Kirksville, MO
                                                                                                Aug 2020 - May 2022

- Updated styling, components, and content for the Diversity Equity & Inclusion website.
- Improved SEO and site accessibility for better visibility and usability.
- Used HTML, JavaScript, and Bootstrap to maintain and enhance the site.
